

Eco Friendly Flooring Now Available Through Keystone Carpets & Floors!

COREtec One Luxury Vinyl Plank

The Best looks of traditional hardwood Flooring in domestic and exotic decors at a great residential opening price point.

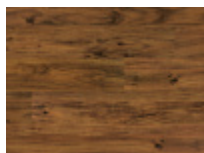

COREtec represents the next revolution in luxury vinyl flooring. COREtec One is a great alternative to glue down LVT, solid locking LVT, or laminate flooring. The patent-pending* construction of COREtec One features our innovative COREtec core structure, which is an extruded core made from recycled wood and bamboo dust, limestone, and virgin PVC. Since COREtec One is 100% waterproof, COREtec floors can be installed in wet areas and will never swell when exposed to water. COREtec One is inert and dimensionally stable; it will not expand or contract under normal conditions. Further, COREtec One never needs expansion strips in large rooms.

COREtec Plus is GREENGUARD Gold Certified for Indoor Air Quality, meaning no harmful off-gassing like many traditional vinyl and laminate options.
